**Distributor:**

**FOR  
METALWORKING  
INDUSTRY**

## Specification:

285 x 2.0t x 32 x 60T

285 x 2.0t x 32 x 80T

360 x 2.6t x 32 x 60T

360 x 2.6t x 32 x 80T

## BT- For carbon/high carbon type:

**Materials** Carbon steel, Alloy steels

The side relief angle can reduce side resistance and heat generation during, thus making this type most suited for cutting high-carbon steels, including non-thermal refining steels, thermal refining steels, and bearing steels as well as large-diameter OD 100 mm materials. High-speed cutting is also possible with this type. Sz : 0.08 mm, F: 10 mm/sec.

## ST- For stainless type:

**Materials** SUS 303/304/316, SUS 430/440C

For cutting stainless steel materials have been developed to allow chips to easily slip off the cutting edge instead of adhering to it.

## Regrinding Service:

**“A brand new saw blade + Regrinding service”**

They could extend the cutting life and save the cost.

Far Easy is associated with a professional team and well worth its value on your spending.

You already got our service in grinding when you buy our saw blades.

Each saw blade is able to be repeat regrinding for 3~4 or more times.

The regrinding cost is much cheaper than you buy a new saw blade.

The cost of regrinding is depends on the actual situation of cutting edge.

If there is any teeth fractured on cutting edge and then firm will charge by renewing.

So, please try to take care on the special teeth for keeping to regrinding more times.

Also save the cost for teeth renew.

### Side Run Out adjusting & edge welding

### Saw blades regrinding

### Saw Blades regrinding

### Projection examination

Suggestion: You may have 20 pcs or more saw blades for regrinding recycle. 10 pcs send to us for regrinding and the others kept on cutting machine. Saving time, Saving money and upgrade capacity.
